CIVIL CONSTRUCTION

SITE™

CIVIL CONSTRUCTION

EARTHWORKS. ROADS AND HIGHWAYS. LEASE. SITE PREPARATION. WELL PADS. AGGREGATES. FENCING AND GATES. CENTRAL PLANT FACILITIES.

SITE knows that civil infrastructure is, in every sense, your foundation for success.

Our commitment to you is to:
Get in. Do it right. Deliver on time.

Get in
SITE has the knowledge and experience to deliver any size civil project – from site preparation and construction for the oil and gas industry to water mains and highways for growing communities.

We know the local climates and geography.

We have the financial strength.

We operate with a strong backing of accessible people, and privately-held equipment and materials to start projects quickly.

Our complement includes:

- A committed workforce of predominately full time staff
- A fleet of modern and maintained heavy equipment, including loaders, graders, bulldozers, backhoes, excavators and production trucks
- 25 aggregate pits throughout Western Canada
- 7,800 square foot metal fabrication shop space

Do it right

We believe in client-centred civil work. The quality, safety and performance of your community roads and highways, access roads, leases, wellsites, and Central Plant Facilities matter.

We do the job right.

Our work begins and ends with the highest quality product and services possible, budget integrity, and an unbeatable emphasis on safety.

Deliver on time

At SITE, all roads lead to success. So does site clearing, grading, excavation, well pads, fencing, Central Plant Facility constructions projects, and all the rest of our civil services.

You can count on SITE to design and execute all of our jobs according to customized, highly-detailed project plans that meet your requirements and schedule. It's how we guarantee best-in-class value every time.

As a fully-integrated energy services company, SITE is equipped to design, deliver and maintain civil infrastructure projects for oil, gas and resource development companies in many geographical areas of Canada and the United States. Our service offerings include a full spectrum of infrastructure, access and environmental solutions.
