

**TRUE TO OUR WORD**

**SITE™**

AS A LEADING ENERGY SERVICES COMPANY OPERATING IN WESTERN CANADA AND THE UNITED STATES, WE KNOW HOW WE WORK IS AT THE CORE OF WHAT WE DELIVER. SITE GUARANTEES OIL, GAS AND NATURAL RESOURCES DEVELOPERS BEST-IN-CLASS ENVIRONMENTAL, INFRASTRUCTURE AND ACCESS SERVICES BY FOCUSING ON:

**SAFETY**  
**INTEGRITY**  
**TEAMWORK**  
**EXECUTION**

WE STAY TRUE TO OUR WORD. **AND OUR WORD IS SITE™**

SITE is an energy services company with expanding in-house capability to deliver results.

We describe our work as Environmental, Infrastructure and Access.

Three more words that come to mind are deliberate, precise and innovative.

We are **deliberate** about delivering fully-integrated Environmental, Infrastructure and Access services in the northern oil sands, Interior Plains, Boreal Forest and Bakken region.

We are **precise** with the planning, safety, training, execution and evaluation for all of our projects.

And our **innovation** is demonstrated through our cohesive set of complementary energy services and our ever-evolving environmental technologies.

Our roster of stand-alone and cohesive services support the lifecycle of your projects – big, small, complex or straight forward.

**Environment:** Our front-end services, which include seismic and geo-technical drilling, explore and prepare remote, resource-rich areas for your operations. Our environmental team returns at the end of a project to clean up contaminated sites and restore disturbed land to its natural state.

**Infrastructure:** Our capability spans from road construction to central plant facilities. Our pipeline includes above and below ground, steam lines, HDPE pipe, flow lines, and plant site, facility and municipal lines.

**Access:** Our environmentally sustainable access solutions include clearing, logging, mulching, seismic, matting, snow making, winter road construction and generator rentals.

# SAFETY

In staying true to our word, safety comes first.

But safety is never just a word at SITE. It's our culture.

Our people, no matter where they sit in the organization, know their first priority is Safety First For Everyone, Always (SITE HSE Manual).

Our attention to safety permeates everything we do, and it is reflected in the health of our people, the quality of our work, and the satisfaction of our clients.

It also impacts our affiliate subcontractors, suppliers and direct service providers. They too are confident that SITE will do everything possible to get them home, safe and well, at the end of the day.

Our most tangible expression of safety is SITE's Safety Management System, which guarantees our clients regular site inspections, equipment and mechanical safeguards, comprehensive employee orientation and training, robust and resilient emergency response systems, industry-leading policies and procedures, detailed investigations of reported near-misses and all incidents, rewards and recognition, and COR Certification.

All of these safeguards and risk mitigation approaches are in place for two reasons:

1. To achieve our ultimate goal of zero incidents and injury.
2. To ensure we continue to be your best-in-class energy services company.

# INTEGRITY

Our integrity comes from our people, and the choices we make.

At SITE, we choose to do the right thing; the right thing for our clients, our people and the communities where we work.

Our founding story describes it best.

SITE came into being through the acquisition of highly-respected, accomplished companies with local knowledge, experience and relationships.

Their commitments to “best-in-class quality management, sustainable activities, environmental protection and investing in healthy and resilient communities laid a solid foundation for SITE.” SITE has carried these commitments forward.

Our integrity is demonstrated by meeting clients’ needs, delivering quality, guaranteeing safety, investing in strong Aboriginal partnerships, hiring and sponsoring special projects within local communities, and investing in technologies and best practices to limit our environmental footprint.

# TEAMWORK

Delivering integrated environmental, infrastructure and access services for resource development is no small feat. We're proud of our ability to tackle projects of any size and in any geographical region.

This ability comes from the strengths of our team.

At SITE, we work with a ratio of about 90 per cent staff and 10 per cent outside providers. We invest in experienced people who understand the complexity of large projects and demonstrate accountability for the success of each project.

One of our team's greatest assets is our proven ability to plan, budget, deliver and report on projects with enviable precision. This strength benefits our team members, creating the optimal conditions for them to align and deliver services, and our clients, guaranteeing them certainty in their operations.

# EXECUTION

When we give you our word, we deliver.

Execution describes what we do for you. And we feel confident that our safety, integrity and teamwork enable us to execute better than anyone in the business. We call this *best-in-class* value.

When we formed SITE, we created a company with depth.

A company with the internal capability to offer a full roster of integrated energy services.

A company that strives to guarantee the availability of its people and the accessibility and condition of its extensive fleet of equipment and machinery.

A company raising the bar in safety, training, and reporting, and guaranteeing an execution plan for every job we bid.
